PrehKeyTec

MCI 60

Ideal for high volume scanning operations where the keyboard is used primarily for a limited set of functions like tendering and PLU's. The MCI 60 has a compact footprint in a matrix layout. Every key position is programmable and combined with the use of double and quad keys, this keyboard becomes a very intuitive, uncluttered user interface for both new and experienced cashiers.

Superior lifespan reduces replacement costs and downtime. PrehKeyTec is so confident of the quality and durability of our German engineering, that a three-year warranty is standard on every unit.

Stuck keys - impossible
Ugly equipment - gone
Learning curves - shorter
Counter space - increased
Down lanes - rarely
Store image - reinforced
Cable management - simplified

Complex Applications

PrehKeyTec's programmability makes even the most complex application seem simple! Our unique design allows the user to program more than 100 key strokes behind each key providing the operator the ability to drill down into an application with a single key stroke. This advanced programmability helps simplify operator training and enhances data input.

Securing All Data

Is your keyboard used to input secure data? PrehKeyTec can help! We encrypt data received from the MSR, or key stroke data

Aggressive Environment

Our robust keyboards are designed to withstand "Heavy Fingers" and 30 million key strokes, a metal base plate allows our keyboard to remain rigid in the most demanding environments.

Spills? our keypads are rated IP54 against spills and dust.
